WEB DEVELOPMENT INTERNSHIP

Submitted

To

School of Computer Science and Engineering

IILM University, Greater Noida, U.P.

In partial fulfilment of the requirement of degree of

B.Tech CSE

BY - RISHIKANT

Admission Number: 25SCS1003000495

Enrollment / Admission Number: 25SCS1003000495

Program: B.Tech CSE

Semester: 3rd Semester

Candidate's Declaration

I, Rishikant, hereby declare that this internship report titled “Web Development Internship” has been prepared for the academic requirements of the Bachelor of Technology in Computer Science and Engineering at IILM University, Greater Noida, Uttar Pradesh.

This report summarizes my internship with ApexPlanet Software Pvt Ltd in Web Development with HTML, CSS, and JavaScript, conducted in virtual/online mode from 16 June 2026 to 01 July 2026. The report is based on the internship offer letter and certificate of completion provided as supporting documents. Any descriptions of development activities are presented as a learning-oriented summary of the internship domain.

I understand that I am responsible for ensuring that the submitted report follows the university’s academic integrity and submission requirements.

Student Name: Rishikant Program: B.Tech CSE

Acknowledgement

I would like to express my sincere gratitude to ApexPlanet Software Pvt Ltd for providing me with the opportunity to participate in a Web Development internship.

The internship, conducted from 16 June 2026 to 01 July 2026, offered an opportunity to strengthen my understanding of front-end web technologies, including HTML, CSS, and JavaScript, through practical learning and assigned activities.

I am also thankful to IILM University, my faculty members, mentors, family, and everyone who encouraged me throughout this learning experience.

Chapter 1: Internship Overview

1.1 Introduction

Web development is the process of creating and maintaining websites and web applications. Front-end development focuses on the part of a website that users see and interact with. During this internship, the stated domain was Web Development with HTML, CSS, and JavaScript. These technologies form the foundation for structuring web pages, styling layouts, and adding interactive behaviour.

1.2 Organization Profile

ApexPlanet Software Pvt Ltd provided the internship opportunity. According to the offer letter and completion certificate, the internship was conducted in virtual/online mode in the domain of Web Development with HTML, CSS, and JavaScript from 16 June 2026 to 01 July 2026. The certificate lists Certificate ID APSPL2649674.

1.3 Internship Objectives

The internship domain supports the following learning objectives: understand the structure of web pages; apply styling to improve layout and presentation; use JavaScript for basic interactivity; learn how HTML, CSS, and JavaScript work together; and develop a systematic approach to building, checking, and refining front-end pages.

1.4 Scope of Learning

HTML: structure and semantic organization of page content.

CSS: colours, typography, spacing, alignment, layouts, and responsive presentation.

JavaScript: basic interaction, event handling, and dynamic changes to page content.

Browser developer tools: inspecting page structure and styles and identifying visible issues.

Testing and refinement: checking page behaviour and presentation across common screen sizes and improving usability.

1.5 Technologies and Tools Used

The internship certificate identifies HTML, CSS, and JavaScript as the core technologies in the internship domain. These technologies complement one another: HTML defines content structure, CSS controls visual presentation, and JavaScript enables interactive behaviour. A browser and its developer tools are commonly used to preview and troubleshoot front-end work.

1.6 Front-End Development Workflow

A typical front-end learning workflow begins by understanding the page requirements, structuring content with HTML, applying styles with CSS, adding required interactions with JavaScript, and then previewing and refining the result in a browser. The following workflow is included as a conceptual overview of the internship domain.

Step 1 — HTML: create the page structure and organize headings, text, links, images, and forms where needed.

Step 2 — CSS: apply layout, spacing, typography, colour, and responsive styling.

Step 3 — JavaScript: add suitable event-driven interactions and update page elements when required.

1.7 Methodology

The learning-oriented methodology can be summarized as a cycle of understanding requirements, implementing the page structure, styling the interface, adding interaction, testing in a browser, and refining the presentation. This sequence helps build a clear understanding of how the three core technologies cooperate in front-end development.

REQUIREMENTS

HTML STRUCTURE

CSS STYLING

JAVASCRIPT INTERACTIVITY

BROWSER TESTING & REVIEW

REFINED WEB PAGE

1.8 Learning Outcomes

Develop a clearer understanding of HTML page structure and semantic elements.

Understand how CSS can improve layout, readability, consistency, and responsive presentation.

Understand the role of JavaScript in adding interactive behaviour to web pages.

Recognize the importance of browser testing and iterative refinement.

Build a foundation for further practice in responsive design and front-end development.

These outcomes describe the skills relevant to the internship domain and are not intended to claim specific projects or deliverables beyond the supplied supporting documents.

Chapter 2: Conclusion

The Web Development internship provided a structured opportunity to focus on the foundations of front-end development. HTML, CSS, and JavaScript serve distinct but complementary roles in building websites. Continued practice with semantic markup, responsive layouts, accessible interfaces, and interactive features can help strengthen these foundational skills.

The offer letter and completion certificate included at the end of this report document the internship domain, mode, duration, and completion.

INTERNSHIP OFFER LETTER

ID - APSPL2649674

16 June, 2026

Dear Rishikant ,

We are pleased to extend an offer for you to join ApexPlanet as an Intern in the (Web Development with HTML, CSS, and JavaScript) program. We believe that your skills, background, and enthusiasm will be an excellent fit for our team.

Your internship is scheduled to commence on 16 June, 2026 and will conclude on 01 July, 2026 During your internship you will gain hands-on experience and deepen your understanding of various concepts in a dynamic environment.

We are confident that your dedication and willingness to take on tasks will contribute to a valuable experience for both you and us.As an intern, you will not be a company employee. Therefore, you will not be eligible for the benefits that our regular employees receive.

We expect you to comply with our company practices, including those related to conduct and confidentiality.We are confident that your internship with us will be rewarding and wish you all the best as you embark on this exciting opportunity. If you have any questions or require further information, please feel free to reach out to us at official@apexplanet.in.

Thank You,
Team ApexPlanet
